

## Insect Control Practice

### Definition/Purpose

An Insect Control system means a practice or combination of practices (planting windbreaks, pre-charging structures, incorporation of waste into soil, etc.) which manages or controls insects from confined animal operations, waste treatment and storage structures, and waste applied to agricultural land. (DIP)

### Policies

1. Unproven technology or techniques must be approved or recommended by the NCSU Animal and Poultry Waste Management Center.
2. Consideration will be given to practices to minimize insects as listed in Attachment 10 of the Fourth Guidance Memo dated January 2, 1997.
3. Each insect control BMP or contract with an insect control BMP must be approved by the Technical Review Committee.

INSECT CONTROL PRACTICE	
<b>Maintenance Period</b>	10 years
<b>BMP Units</b>	EACH
<b>Required Effects</b>	ACRES_AFFECTED ANIMAL TYPE ANIMAL UNITS N and P Waste Managed
<b>JAA/NRCS standards unless otherwise noted</b>	NRCS Technical Guide as appropriate.
<b>CS2 Reference Materials</b>	NC-ACSP-11 Signature Page Map with BMP location, fields, and roads.
<b>Additional Spot-check Requirements</b>	All waste management systems for operations not permitted by the Division of Water Resources must be spot-checked annually for five years following implementation.
